EMV® Specification Bulletin No. 201
First Edition January 2018

PPS

This Specification Bulletin changes requirement 5.8.1.1. It allows the PCD to send a PPS command if the PICC indicates support for higher bit rates.

Applicability

This Specification Bulletin applies to:

- *EMV Contactless Specifications for Payment Systems, Book D – EMV Contactless Communication Protocol Specification, Version 2.6 – March 2016.*
- *Specification Bulletin No. 186: PPS Command*

Related Documents

- *None*

Description

This bulletin changes PPS requirement 5.8.1.1 for the PCD. The PCD is now allowed to send a PPS command in case the PICC indicates support for higher bit rates.

Proposed Specification Change

Change Requirement 5.8.1.1 as follows:

Requirements 5.22: PPS Command

PCD		PICC	
5.8.1.1	If the PICC indicates in TA(1) of the ATS that it supports only a bit rate of 106 kbits/s in both directions, then t~~T~~he PCD shall not send a PPS command. *If the PICC indicates in TA(1) of the ATS that it supports higher bit rates, then the PCD may send a PPS command.*	5.8.1.2	If the PPS command is not the first block received after the PICC has sent the RATS response, the PICC shall ignore the PPS command.
